# PROPOSED SOLUTION

*(Campus to Corporate - AI-Powered Employability System)*

Campus to Corporate (C2C) is an AI-powered employability platform that parses student transcripts and resumes, diagnoses skill gaps u
12-week learning roadmaps, rewrites resumes into STAR format, and conducts AI voice mock interview

### 1. Profile & Transcript Capture

Parses grades, subjects & skills using OCR & text parsers.

### 2. AI Skill Gap Diagnosis

Recharts radar overlay comparing skills against target roles.

### 3. Actionable Learning Roadmap

Maps missing skills to Swayam, NPTEL, & Coursera courses.

## Detailed Explanation

- Analyzes student academic records & CGPA.
- Recommends tailored career pathways.
- Calculates instant Employability Score %.
- Generates 12-week step-by-step roadmaps.

## How it Solves Problem

- Bridges 48% graduate unemployability gap.
- Overcomes 1:1,000 college TPO counselor limits.
- Democratizes career guidance in tier-2/3 MP.
- Centralizes MP Rojgar & NATS scheme access.

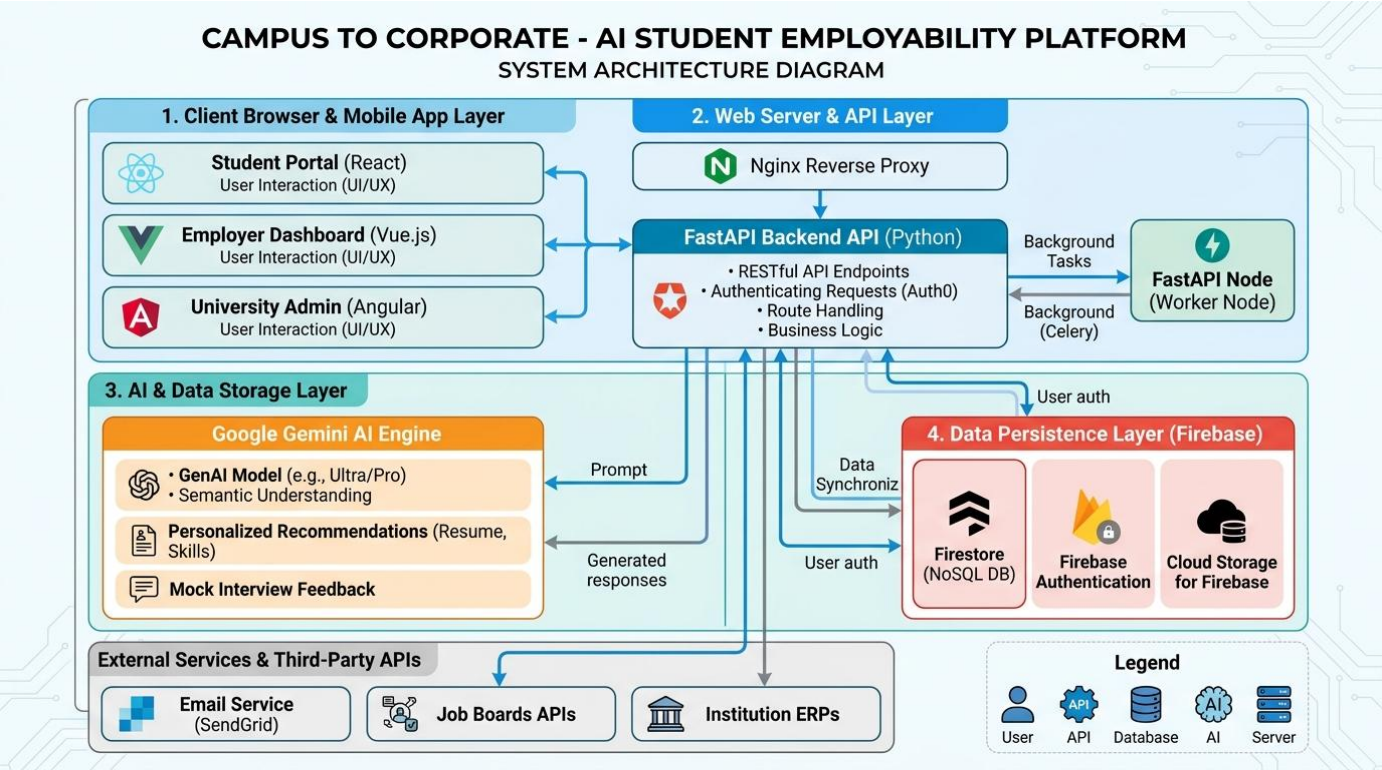

## Key Fe

1. Emplo
2. Recha
3. 12-We
4. Swaya

# TECHNICAL APPROACH

*(System Architecture & Technology Stack)*

## Key System Components

1. Student Transcript & Skill Pars
2. Recharts Employability Skill M
3. Google Gemini 2.5 Flash GenA
4. Voice & Text AI Mock Intervie
5. RFC 7519 JWT Auth & Multi-U
6. MP Rojgar & Public Scheme In

## Technology Stack

Antigravity AI

# FEASIBILITY & VIABILITY

*(Practicality, Sustainability and Real-World Impact)*

## Feasibility (Can it be built?)

• Technical Feasibility:
Uses proven web technologies (React 19, Node.js, Gemini API).

• MVP Readiness:
100% functional working prototype verified with 0 build errors.

• Hardware Requirements:
Zero expensive hardware needed; runs smoothly on student smartphones or standard web browsers.

• Operational Simplicity:
Zero-config user login with pre-configured JWT test personas.

## Viability (Will it create real value?)

• Economic Efficiency:
Ultra-low compute cost (< ₹0.15 per student/mont

• Institutional Scale:
Scalable across all government and private univers

• Value for Students:
+35% higher placement selection rate & 100% care

• Value for Colleges (TPOs):
80% reduction in manual counseling workload with

Antigravity AI

# IMPACT AND BENEFITS

*(Creating Employable Graduates for Viksit Bharat 2047)*

### For Students

+35% higher interview selection rate; 100% roadmap clarity.

### For Colleges (TPOs)

80% reduction in manual counseling workload with batch analytics.

### For State Govt (MP)

Centralizes MP Rojgar & Swayam/NPTEL adoption across districts.

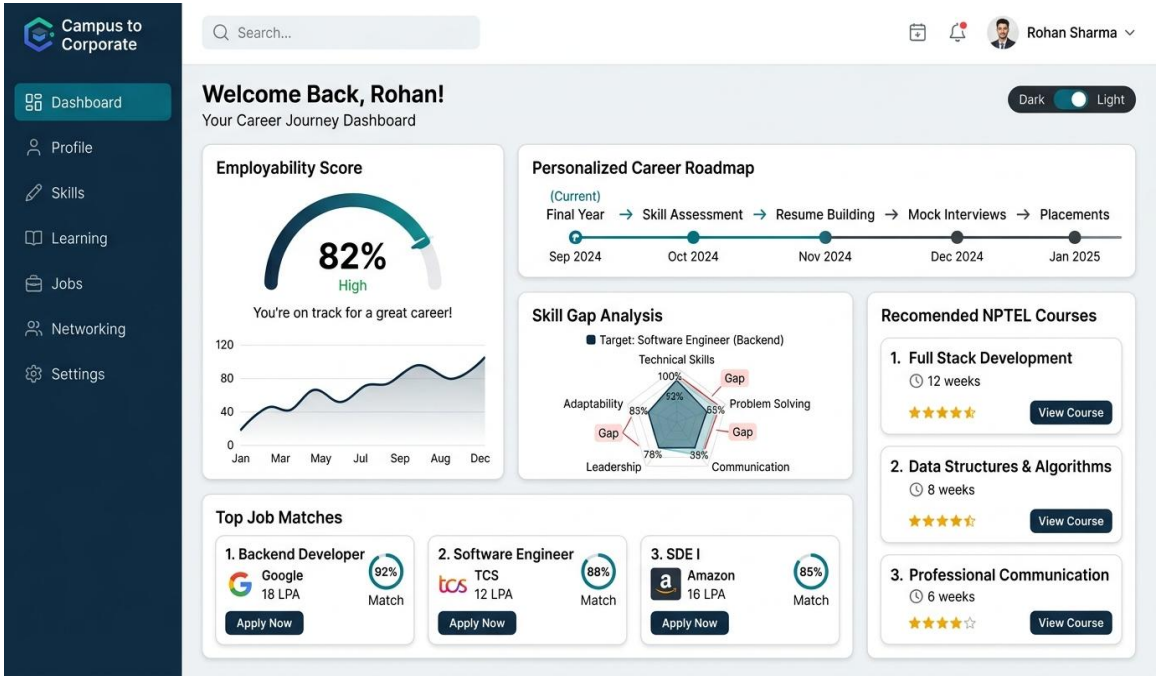

## Expected Quantitative Improvements (With C2C System)

| Metric | Traditional Method | With C2C Platform |
|---|---|---|
| Career Roadmap Gen | 7 - 14 Days (Manual) | Instant (< 3 Seconds) |
| Resume ATS Review | Manual / None | Automated STAR Rewrite |
| Student Progress Track | Unstructured Spreadsheets | Live Radar & Gauge |

# WORKING MVP SCREENSHOTS

*(Student Dashboard & AI Mock Interview Interface)*

Skill Gap & Readiness Dashboard

Interactive AI Mock

**100% Working Prototype Verified**

Antigravity AI

# INNOVATION & ORIGINALITY

*(Unique Differentiators vs Existing Platforms)*

### 1. Recharts Skill Radar Overlay

Compares student proficiencies directly against real-time industry role benchmarks.

### 2. Voice & Text AI Mock Interviewer

Simulates technical interviews with speech dictation,

### 3. STAR ATS Resume Auto-Rewriter

Transforms passive bullet points into high-impact metric-driven STAR statements.

### 4. Institutional Placement Dashboard

Empowers college placement officers (TPOs) with bat

# JUDGING CRITERIA ALIGNMENT

*(Direct Mapping Against MPOnline Evaluation Criteria)*

| Criteria | Weight | Campus to Corporat |
|---|---|---|
| Innovation & Originality | 20% | Recharts Radar Skill M Rewriter. |
| Prototype / MVP | 20% | 100% working React (`dist/`). |
| Problem Understanding | 15% | Addresses 1.5M+ gra limits. |
| Technical Feasibility | 15% | React 19 + Vite + Ger |
| Impact on Higher Ed / Governance | 15% | Direct integration wit |
| Scalability & Sustainability | 10% | Serverless architectu |

# WHY SELECT THIS SOLUTION?

*(Key Arguments for Jury Evaluation)*

## 4 Core Reasons Why "Campus to Corporate" Deserves First Place

**1. Fully Built & Verified Prototype (Not an Idea):**
**Unlike conceptual entries, C2C is a fully functional web application compiled with zero build errors.**

**2. Purpose-Built for Madhya Pradesh & Viksit Bharat:**
**Integrates MP Rojgar, Swayam/NPTEL, & NATS state schemes directly into student career roadmaps.**

**3. Highest Innovation Value (20% Weightage):**
**Combines Google Gemini GenAI, Recharts radar geometry, voice speech synthesis, and JWT authentication.**
